651-223-3002 (Fax)**

# CAPITAL IMPROVEMENT PLAN

---

## INTRODUCTION

One of the City Council's top goals for 2012 was to develop and implement a responsible Capital Improvements Plan (CIP) for the City. To that end, City staff, and the City Council have examined and prioritized the City's infrastructure needs over the seven year period from 2014-2020. Their findings are included in this plan.

The plan takes into consideration the City's goals and priorities, as well as the City's financial capabilities. The CIP is directly related to the goals and policies of the City's Comprehensive Plan, and will serve as a work plan for the City staff and City Council. It is important to note that this CIP is only a plan; the City Council will need to evaluate each project prior to implementation to determine if it is consistent with the proposed financing plan and appropriate for implementation.

## CIP PROCESS

The CIP was developed as part of a collaborative process between the City Council, and City staff. The specific process used was as follows:

1. Compiled and Prioritized Projects: City staff reviewed and prioritized the City's infrastructure needs, and prepared a preliminary plan. The preliminary plan was reviewed with the City Council prior to the financial analysis
2. Determined Funding Sources: The appropriate funding source(s) for each project were determined based on its intended use. The recommended funding sources were clearly defined for each project in the plan.
3. Determined Financial Impacts: The CIP will include an analysis of the impacts on the tax levy and utility charges during the five-year period.
4. City Council Public Hearing: The City Council reviewed the CIP at a Public Hearing on July 15, 2013. At the hearing, the City Council provided an opportunity for residents to ask questions or provide comments for Council consideration. After the hearing was closed, the City Council approved Resolution XXXX-XX, thereby adopting the CIP.
5. Annual Review/Update: The City Council will review and update the CIP as part of the annual budget process and decide upon the acceptability of the prioritization, funding sources, and financial impacts.

**2014 through 2020**  
**City of North St. Paul, MN**

---

**Project Name:** Water Meter Replacement  
**Year:** 2014-2016  
**Useful Life:** 20-30 years  
**Category:** Water Supply Improvements  
**Total Project Cost:** \$121,000 - \$176,000 per year

---

**Description:** Water meter replacement.  
**Justification:** Required replacement as maintenance – new meters will improve accuracy, allow for reading efficiencies, and reduce ongoing maintenance costs.

---
